Arnold Schwarzenegger
Governor

October 12, 2009

South Lake Tahoe – As the winter season approaches the Lahontan Regional Water Quality Control Board (Water Board) reminds individuals conducting earth-disturbing construction activities in the Lake Tahoe Basin (and, in some cases, in the Truckee River watershed) must cease and projects “winterize” by **October 15, 2009**. “Winterize” means the stabilization of disturbed areas by appropriate erosion and/or sediment control measures to prevent soil movement permanently or temporarily in a manner that will remain effective until May 1, 2010.

The Water Board and the Tahoe Regional Planning Agency may grant variances to the grading prohibition on a case by case basis in situations where grading is necessary for reasons of public safety, water quality protection, erosion control, or if it can be shown that granting such a variance would not cause or contribute to the degradation of water quality.

For persons conducting activities under a Water Board permit or directive and seeking a variance to the October 15, 2009 soil disturbance prohibition, contact Water Board staff to ensure that all necessary information is provided to Water Board staff in adequate time for consideration of a variance before the October 15, 2009 prohibition date. Get a [Request Form for Variance to the October 15, 2009 Soil Disturbance Prohibition Date](#) from our Website or contact Water Board staff at (530) 542-5400. Use of the form will expedite processing.

Thank you for working with us to protect water quality.
